

Liberal Arts

This Associate in Arts (A.A.) degree program offers the equivalent of the first two years in a four-year Bachelor of Arts or Bachelor of Science program. In this flexible program, students select courses based on the requirements of the four-year college to which they plan to transfer. Working with an advisor, students design a program that best meets their future plans. It is recommended that students identify the college to which they plan to transfer and discuss a transfer plan with their advisor as soon as possible.

Because this program requires several elective courses, students are able to direct their attention to courses that interest them from a selection of general subjects. This allows students to explore what topics interest them most before graduating to a four-year program.

Upon completion of the program, students have an academic background sufficient to transfer into a baccalaureate degree program. The program provides a foundation for the acquisition of skills and abilities essential for jobs requiring a broader base of arts and sciences. In addition, students have the option of a one-year certificate in Liberal Arts.

Students may start this degree program in the fall, spring or summer semester.

The Job Market

While specific, technical skills may open some doors in one or two industries, having a broad range of knowledge and skills provides more opportunities in more places. The Liberal Arts program prepares you to succeed in other colleges and in the working world beyond.

Get a Start on Your Future

Having general skills in writing, mathematics and interpersonal communication are a necessity for success in today's world. LRCC's Liberal Arts program is designed to prepare anyone for what is ahead, whatever and wherever it might be. Close to home and affordable, LRCC is the right choice.

- Call the school to set up an appointment with Admissions or Liberal Arts faculty to see what we have to offer
- Stop by. Come by the school to see our facilities and talk to our students and teachers. Get your information first hand.

Graduates of this program master eight general outcomes designed to prepare them to perform competently and confidently in a rapidly changing world. Four of these outcomes involve their ability to:

- communicate effectively both verbally and non-verbally;
- explore diverse ideas and emotions, as expressed through the disciplines, to evaluate the effect of historical trends, events, institutions, and social systems as applied to the Liberal Arts;
- perform mathematics basic to functioning in present and future disciplines or occupations and to prepare for further education;
- demonstrate scientific thought both quantitatively and qualitatively by learning to recognize and formulate questions for analysis of human and technical problems.
