Marine Maintenance

Why Marine Maintenance?

The Marine Maintenance certificate is a seven-month program which starts in the fall semester. Classes meet twice per week, and students are encouraged to work part time in a marine setting while completing the program. LRCC has established partnerships with more than 30 marinas throughout New England and works closely with students to place them.

Upon successful completion of the program students will earn both a Certificate in Marine Maintenance from LRCC and Mercury Maintenance Certification from Mercury Marine.

Additional degree options are available for students who wish to continue studying for an associate degree. Industry reports show an annual growth of 5% in this trade, with a shrinking supply of qualified technicians. Job opportunities are more abundant than ever!

Graduates will find employment as inboard drive, or outboard technicians. Many other opportunities in the recreational off-road market, such as motorcycle and snowmobile technician, are also available.

Highlights:

- Seven-month program (August 29 - March 10)
- Classes meet twice a week
- Student works in marina part-time
- Mercury maintenance certification
- Liberal Arts degree option

Skills Learned:

- Winterizing I/O and OB
- Trailer maintenance
- Engine tune-ups
- I/O drive service
- Cooling systems including water pumps
- Rigging, Engines, controls and wiring
- Fuel system service
- Electrical theory (Bilge pumps, navigational lighting trailer lighting, starting/charging systems, basic testing)

Estimated Program Cost:

- \$4,838

*Costs are based on in-state tuition and do not include fees, supplies, or books. Additional fees may apply; all prices are subject to change.
